XPANDER XPANSION !!!

XPander!

Over the last few years XPander has established itself as perhaps the premier high-end power distribution product in high-end audio.

It provides outstanding resolution, dynamics, tonal balance, harmonic integrity and purity. As with all Kubala-Sosna products, it does so from an extremely quiet background.

Marshall Nack commented in his PFO review, "... it is fully expressive of the beauty in music—the XPander balances both sides. This is great stuff, the best product yet from the K-S brand."

Jim Merod, in his PFO review said the following, *"The central virtue of the XPander is its mysterious ability to make each attached piece of audio-related equipment perform at a significantly higher level of sonic detail and musical relaxation."*

Never in the solitude of my listening realm have I placed a piece of gear, of any kind, into its overstocked racks that so thoroughly transformed the total musical envelope and detailed vivacity of my system with so much added resolution."

Owners of XPander have offered similar praise. However, a common suggestion was to have a unit with more outlets.

In response to that, Kubala-Sosna is announcing a 10-outlet XPander! The original 7-outlet will continue to be available.

The new unit continues to use the *no-buss-bar* design and utilizes the same *point-to-point* wiring philosophy as the original XPander. Yes it is more expensive to manufacture, but the sonic results are worth it!

We invite you to experience the magical enchantment of Kubala-Sosna products that **Connect to the Performance** like no others!

Please let us know how you enjoy your experience with **XPander!**

INTRODUCING PERSUASION CABLES !!!

Kubala-Sosna Research is proud to announce a new cable line - we call it **PERSUASION!**

This new cable is a trickle-down design from the newest Opti-miZ3 cables announced in 2017.

Persuasion is our best cable utilizing traditional architecture, and is placed in the line between Anticipation and Fascination.

Persuasion improves on the performance of Anticipation in dy-

namics and transparency, while maintaining the overall balance that is the hallmark of every Kubala-Sosna cable.

Like all K-S cables, performance is far above its price point.
