Connect to the performance

Kubala•Sosna
RESEARCH LLC

OVATION ... OUR NEWEST FLAGSHIP!!

REALIZATION has been our best performing series since 2017. Each of the cables in this series have earned well-deserved reputations as being "flawless."

We are proudly announcing a new flagship cable, we call it **OVATION**, that *improves the overall performance of REALIZATION!*

At the Munich Show last month, we gave our dealers and distributors in attendance a sneak preview of this exciting new offering based on our newest design, *OptimiZ4*.

OVATION builds upon our three previous architectures, and we dare say improves the entire performance envelope.

That means that it is not just one aspect that is better, but rather, that the increased performance is evident across the board! That is the reason I put the word *flawless* in quotation marks in the

first paragraph, as we now have a "*more flawless*" cable!

As our systems improve ... as speakers, electronics, and sources get better, producing higher levels of information ... designers can listen more critically, and all of us can listen more deeply into the music!

As a result of *eight years* of discussions, designs, and prototyping ... **OVATION** ... utilizing *OptimiZ4*, offers the largest performance envelope we have ever created!

There are discernable audible improvements to every aspect of the musical presentation, offering an increased ability to *Connect to the Performance* resulting in hearing a more sophisticated and nuanced musical performance!

As always, we intentionally do not stress technical issues as we are of the opinion that they do nothing to help understand the *sound* of our, or really, any products.

We will say that like all of the other members of our *OptimiZ* families, **OVATION** continues to utilize the basic tenets of our two U.S. Patents but with significant changes to stranding and geometry.

We are also introducing a second member of the *OptimiZ4* family ... **CELEBRATION**. This cable will fall between the *Emotion* and *Sensation* series.

Both of these new offerings are available for order now, and first ship will be in July.

Kubala-Sosna cables truly do make a difference - if you have not already heard that for yourself, we encourage you to audition them.

We are confident that if you do, you will agree with thousands of Kubala-Sosna owners who know they do. In fact, we guarantee it!

AUDIO SHOW SCHEDULE

Kubala-Sosna continues to participate in, and get recognized for outstanding sound at Audio Shows around the World:

Warsaw Audio Show - Oct '24
Capital AudioFest - Nov '24
SouthWest AudioFest - Mar '25
AXPONA Chicago - Apr '25
High-End MUNICH - May '25
T.H.E. Show SoCal - Jun '25
Tokyo Audio Show - Jul '25
Hong Kong AV Show - Aug '25

These exhibits used various levels of Kubala-Sosna cables:

CAF '24/ GTT Audio:

"the weight of the bass was surprisingly subterranean—not just heard, but felt as well ... The percussion instruments had impactful dynamics, and the piano tonality was nearly spot-on."

Dennis Young/ Sound & Vision

AXPONA '25/ Quintessence:

"The sound was simply gorgeous ... superbly dense in color, texture, dynamics, body, dimensionality, and staging. Meltingly beautiful on strings, high and low ... it was breathtakingly lovely. to listen to" *Jon Valin*

CAF '24/ Audio ALMA:

"this rig delivered the goods way beyond its price point ... its super large soundstage, lush tonality, and wide frequency range." *Ken Micallef*

SW AudioFest/ Krystal Clear:

"Krystal Clear AV of Dallas, showing an insanely wonderful sounding all-Burmester system, hitched together with Kubala-Sosna Realization cabling." *Greg Weaver*

MUNICH '25/ WOD Audio:

"The sound was dark, rich, and listenable with exceptional recovery of depth and decay and very deep-going, naturally rounded bass. An excellent showing." *Jon Valin*
